

Full service digital printing

Fast, high-quality printing, rivalling the quality of the offset litho process with fully customised content

When it comes to print, we understand your businesses need for quality, speed, flexibility and economy. We meet that need by investing in the best people, technology and equipment – all geared to delivering print work of the highest quality, in the most efficient way possible.

Key Features

- Digital printing eliminates the need to create films and plates
- No 'make-ready' stage
- Cutting-edge print technology: IBM Infoprint 4100, Xerox IGEN3s, Docutechs and 6060 Docucolour digital presses
- Colour digital capacity of more than 250,000 A4 pages per day.
- Monochrome digital capacity of more than a million A4 pages per day
- Substantial design and variable data processing services

Benefits

- Fast turnaround
- Exceptional quality
- Choice of colour or black-only printing, litho overprint
- Ability to specify exact print run – from thousands of copies down to a single book – eliminates over-estimating and storage costs
- Experienced in-house graphic design team can increase project effectiveness from concept to delivery
- Variable data and personalisation can be easily incorporated
- Full in-house finishing service includes perfect binding, saddle stitching, folding and drilling
- Mailing and fulfilment service

Full service digital printing

A Case In Point

DG3 prints millions of pages every month for one of the world's largest telecommunications companies. Projects range from high-volume, complex, monthly customer statements to smaller ad-hoc marketing campaigns. We also handle the client's daily printed applications, including dunning letters, direct debit forms, welcome packs and other marketing materials.

Client data is delivered directly to our secure servers 24 hours a day, 7 days a week, and formatted for immediate print production. Customer data is cleansed, manipulated and enhanced using a range of processes – including Mailsort/Walksort, PAF validation, multi-file merge/purge, de-duplication, salutation creation and verification, case conversion and data suppression – all designed to maximise the client's effectiveness and impact whilst remaining within budget.

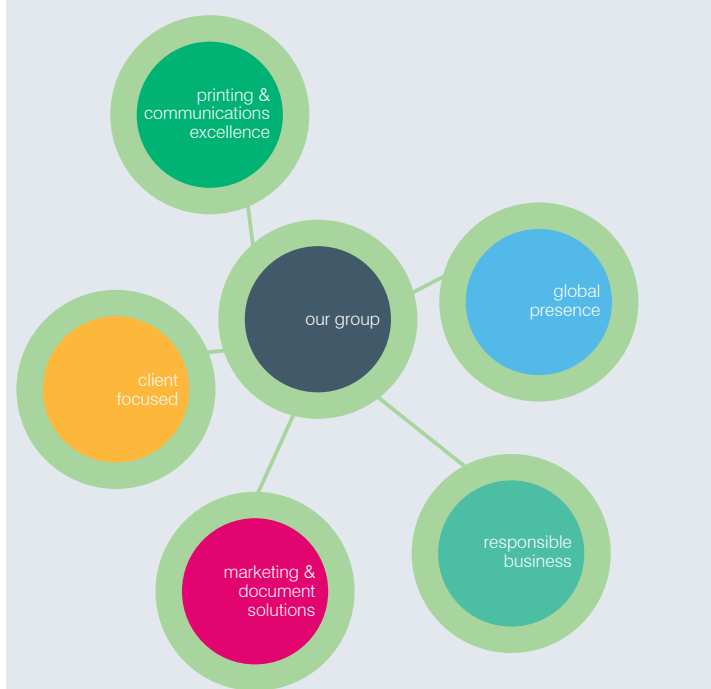

DG3 Group Services

DG3 is a leading global provider of global print and communications services with locations across four world regions and a world-class team of over 700 associates.

We believe in making a difference and we do this with some of the world's largest and most discerning organisations every day, delivering superior integrated communications solutions.

Our services include:

- Creative and marketing services
- Typesetting, document composition and regulatory filing
- Desktop, graphics and print outsourcing
- In-house litho and advanced digital printing
- Print binding and finishing services
- Mailing, fulfilment and distribution
- Document Process Outsourcing services
