

The document solutions partner
of choice for global Investment
Companies, large and small.

With growing reporting requirements and shrinking schedules, our clients rely on us as a single-source supplier of shareholder compliance and marketing communication services. Investment Companies trust DG3 to ensure they maintain accuracy, meet deadlines and manage costs.

Diversified Global Graphics Group - DG3

DG3 is a vertically integrated graphic communications company specializing in the production and distribution of time-sensitive documents, on-demand printing and marketing collateral for investment companies and financial institutions. DG3 is one of the largest printing companies in the world and one of the few truly integrated graphic communications organizations.

Investment Company Communications

Supplier of choice for many of the world's largest Fund complexes, DG3 produces corporate communications and compliance documents including: annual shareholder reports, prospectus and other regulatory reports, fund fact sheets and marketing collateral.

As Investment companies, you have to communicate with your clients, reach out to potential investors and meet your regulatory requirements. DG3's experience can help you with everything from design, typesetting, offset and digital printing through document management and workflow solutions.

An Integrated Approach

At DG3, we take a consultative process approach, including product analysis and alternatives as part of our "boarding-process". This enables us to develop and share best practices, to ensure that processes are cost effective, efficient and appropriate. Our experienced account team will develop the project plan and manage every aspect of the process with you. We deliver the solutions you need when you need them.

Traditional Document Composition and EDGAR Services

DG3 provides complete composition and EDGAR services. Our team of customer service representatives and composition specialists are seasoned financial services professionals dedicated to your account. Whether you plan to distribute your content via the internet or in print, we provide fully integrated solutions.

DG3 stands ready 24/7 to manage even your most complex documents, quickly, accurately and cost effectively.

Document Conversion and Hosting

DG3 will convert your printed documents to either PDF format or an Internet-ready HTML document using **i-version**, an innovative solution for converting your regulatory reports and documents into interactive web documents for hosting and distribution in one click. Your shareholders will need no additional software to read the document, and your online document will be identical to your print document, rendering proofreading unnecessary. With the HTML option, we will index your document for easier viewing.

Manufacturing Services

As a full-service communications provider, DG3 is your partner in meeting stringent compliance deadlines.

Print Services - Each of DG3's worldwide manufacturing operations is fully integrated to provide the full range of products required by Investment Companies, whether a single copy of a shareholder report or one million pre-sale marketing kits. Integrated finishing services will also reduce turnaround time and cost.

Fulfillment and Mailing - We also provide highly customized fulfillment, pick and pack, and mailing solutions, including automated and customized kit creation using DG3's web-based **KitBuilder** application.

Global Presence

DG3 operates in strategic geographic markets and financial centers worldwide including: Jersey City, London, Hong Kong, Tokyo and Manila. Many international businesses rely on DG3 to distribute and print to their key markets globally. By using a globally integrated provider you achieve consistent standards, better control costs and reduce your time to market.

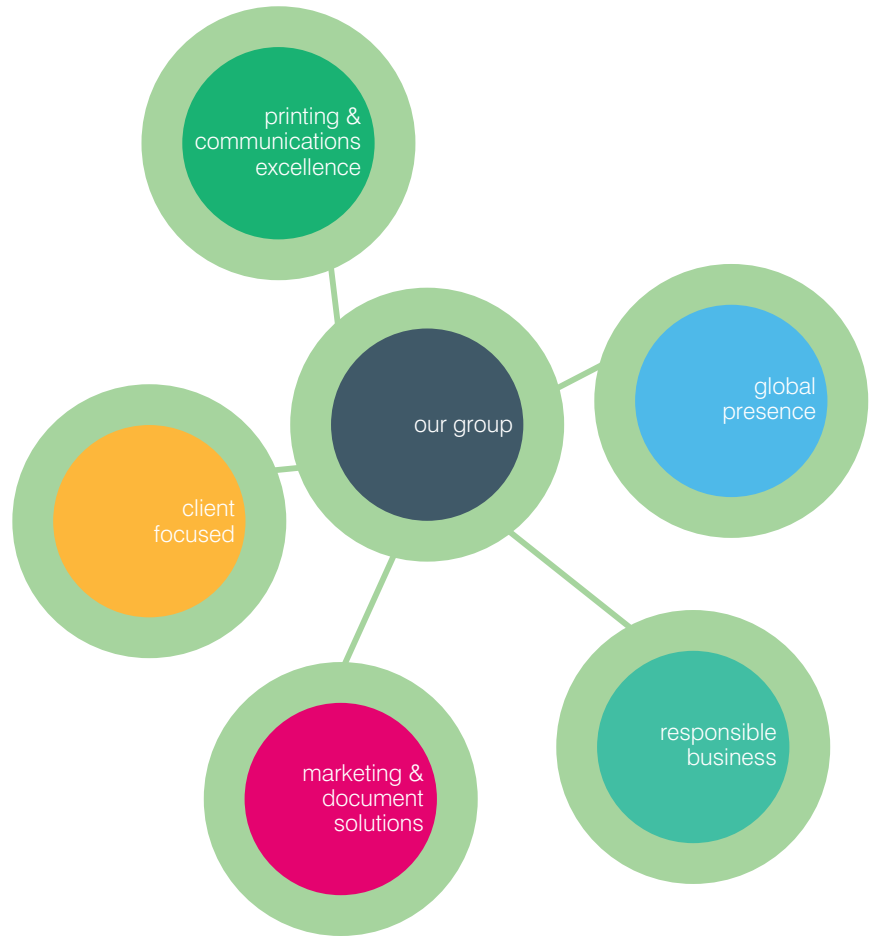

Environmental Responsibility

DG3 is ever mindful of our impact on our global environment. We have received the FSC Chain-of-Custody Certification to promote responsible management of the world's forests. Many of our facilities are also certified to the ISO 14001 environmental standard.
