

Send Automated Tactile Communications from YOUR Marketing Tech Stack

Direct mail on autopilot made simple:
- no complex APIs or coding.

Now you can trigger and track real mail, as easily as email. Stand out with personalized letters, cards, brochures and dimensional items - with no coding, complex APIs or manual processes.

Just set it & forget it.

Digitally transform your Direct Mail and replace outdated, offline processes.

Say goodbye to endless emails, ftp sites and offline project management.

Create, manage and approve your templates, campaigns and approvals from one application.

Send triggered mailings or user driven ad-hoc sends to small segments or large audience.
